PRESS RELEASE

County Television Translator Service Temporarily Off-Air

On Monday, December 10, 2018, the County will be conducting maintenance work on the television translator system located on Mt. Pisgah in Wellsville Canyon. All channels will be off-air during this time most likely from 8 am to 5 pm. This work is due to the FCC selling channels 38 and above requiring a reallocation of all broadcast channels.

When the system is back on-air, it will be necessary to rescan or reprogram all televisions that receive over-the-air signals from the translator in order to recognize the new channel allocations. Once rescanned, there should be no discernible change in television service. Those who receive television via cable or dish will not be affected.

The County regrets the inconvenience and appreciates citizens' patience while the work is being done. County Executive, Craig Buttars, suggests taking advantage of the time to go Christmas shopping.
