Bonneville Shore Line Trail Mitigation Work

PRESS RELEASE

FOR IMMEDIATE RELEASE

June 5, 2018

The Cache County Fire District will be performing fuel mitigation work along the Bonneville Shore Line Trail between Providence and Millville canyons. Mitigation work will consist of thinning of hazardous fuels in the effort of reducing the risk of catastrophic wild fires.

The trail will remain open during mitigation work. Mitigation work will be performed throughout the summer. Please be aware crews will be using equipment on the trail.

The benefit of the fuels reduction is to prevent wildfire from moving into the communities and will help improve firefighter safety and public safety in the event of a wildfire.

Many communities in Cache County have entered into an agreement with Utah Forestry Fire and State Lands to perform fuels reduction and wild fire prevention efforts. For further information please contact Cache County Fire Warden Ken Mathys 755-1675.
